**ABSTRACT OF THE DISCLOSURE**

An apparatus and method for displaying multiple gaming device interfaces for a gaming device ~~the same wagering game~~ is provided. The game can be slot although other wagering games are also within the scope of the present invention. The interface which is displayed can depend upon the wager level. ~~In one embodiment, the exact same game is played using one of a plurality of different display interfaces, wherein the gaming device enables the player to select which interface to play. The player can play the game for a while using one interface and then switch interfaces to provide a fresh display or to change the player's luck. The player can then switch back to the original interface or select a brand new interface depending upon how many interfaces overall are provided.~~
